

Nanotech Industries Inc.

Makers of Green Polyurethane™

[Nanotech Industries, Inc. - Helping Infineon Raceway Go Green](#)

Infineon Raceway used Nanotech Industries, Inc.'s "Green Polyurethane™" for the first time on one of its high-traffic garage floors as it hosted the 2009 Toyota/Save Mart 350 race, part of the NASCAR Sprint Cup series. A first-of-its-kind, green industrial floor coating, "Green Polyurethane™", is a nano-based, high-performance, industrial floor coating which completely eliminates toxic isocyanates from its chemistry while maintaining high performance. It is zero VOC, chemical resistant, water resistant, UV resistant, safe to handle, with no toxic fumes. This innovative, environmentally-safe, industrial floor coating was nominated for the 2009 Presidential Green Chemistry Challenge Award, an award competition led by the U.S. Environmental Protection Agency's Office of Pollution Prevention and Toxics. As a nominee, "Green Polyurethane™" stands among those outstanding chemical technologies that incorporate the principles of green chemistry to help industries achieve their pollution prevention goals.

Nanotech Industries, Inc. is a proud partner of Infineon Raceway in its company-wide initiative to "go green."

About Nanotech Industries, Inc.

Nanotech Industries, Inc. is a San Francisco-based, nanotechnology company with green solutions. Its core mission is to provide cutting-edge, environmentally-friendly engineering solutions using advanced materials. "Green Polyurethane™" is its first nano-based, green chemistry product and platform for the paint and coatings industry. For more information, see www.NanotechIndustriesInc.com

About Infineon Raceway

Infineon Raceway is one of the premier motor sports venues in the country, hosting the NASCAR Sprint Cup Series, NHRA Full Throttle Drag Racing Series, and the IndyCar® Series. It is owned and operated by Speedway Motorsports, Inc. (SMI), a company with one of the largest portfolios of major speedway facilities in the United States, including Infineon Raceway, Atlanta Motor Speedway, Bristol Motor Speedway, Kentucky Speedway, Lowe's Motor Speedway, Las Vegas Motor Speedway, New Hampshire Motor Speedway, and Texas Motor Speedway. For more information, see www.infineonraceway.com

GREEN POLYURETHANE™ - High Performance Coating

While other Polyurethane-based coatings claim to be green, they still contain toxic isocyanates. Green Polyurethane™ goes beyond “meeting guidelines,” by eliminating the toxic source of the problem while maintaining high performance. Our innovative chemistry platform, removes toxic isocyanates completely from the formulation. Tough as nails, easy to use, cost efficient. No respirators needed. With Green Polyurethane™ you can literally breathe easier.

Features:

- High gloss
- Chemical resistant
- Water resistant
- UV Resistant
- Superior adhesion
- Solvent-free
- Zero VOC
- 100% solid
- Safe & easy to handle
- No harmful fumes
- Premium performance on concrete & metal
- Reduces labor costs
